

STUDY PLAN

It is required to submit a STUDY PLAN, each year from November 20th to March 20th, to specify the selection of courses, the choice for the two fully eligible courses and that between Internship, two Laboratory AAF Courses or Internship in parallel to Thesis. Without a Study Plan it will be not possible to book at the exam session.

The fully eligible courses can be selected among those given without Master courses in Energy Engineering (in English or Italian) or in Mechanical, Aerospace, Chemical or Environmental Engineering. These courses could be either by 6 credits each one, or one by 6 credits and one by 9 credits.

The Internship can be replaced by two AAF Laboratory Courses by 3 credits each.

The study plan is filled and uploaded on the INFOSTUD website, using given username and password.
