

## 2020/2021 1st semester

from 28 September to 18 December

| 3rd year L23 | MON   | TUE                         | WED   | THU  | FRI   |
|--------------|---|-----------------------------|---|--|---|
| 9.00-10.00   | Bioclimatic building design                   |                             | Structural design   | Sustainable community planning                   | Sustainable community planning                              |
| 10.00-11.00  | Bioclimatic building design<br>until 11.30 am |                             | Structural design<br>until 11.30 am                         | Sustainable community planning<br>until 11.30 am | Sustainable community planning                              |
| 11.30-12.30  |   | Bioclimatic building design | Principles of environmental<br>engineering<br>from 12.00 am | Structural design                                | Principles of environmental<br>engineering<br>from 11.00 am |
| 12.30-13.30  |   | Bioclimatic building design | Principles of environmental<br>engineering<br>until 2.00 pm | Structural design                                | Principles of environmental<br>engineering<br>until 1.00 pm |
| 14.00-15.00  |   |                             |   | Principles of environmental<br>engineering       | Principles of environmental<br>engineering                  |
| 15.00-16.00  |   |                             |   | Principles of environmental<br>engineering       | Principles of environmental<br>engineering                  |
| 16.00-17.00  |   |                             |   |  |   |
| 17.00-18.00  |   |                             |   |  |   |

hours off line for exercises and  
lessons recorded
