DIGITAL ECONOMIES AND SPATIAL REFIGURATION: FROM STREAMING TO CLICK AND COLLECT

TECHNISCHE-UNIVERSITÄT BERLIN and
CREATe AHRC, GOLDSMITHS, UNIVERSITY OF LONDON

ROOM 230, 2nd Floor, BH-N Building,
Technische-Universität Berlin, Ernst Reuter Platz 1.

30TH JANUARY 2020, 11.00 - 18.40. ALL WELCOME

How has the rise of digital economies re-calibrated space/labour relations in the context of changing landscapes of urban governance? This will be a forum for addressing questions about the spatial organisation and network structures of key digital actors in the new political economy. How has the information society transformed structures of consumer culture? How can a sociology of space through the affordances of the digital, increase our understanding of the emerging syncopations of everyday life? How can we chart the intersections of macro-players of the new political economy, with low-paid multi-taskers in the creative industries, and with inflections of urban governance of space and place? How to develop new sociological understanding and methodologies for these transformations?

11.00 - 11.20 Introduction. Angela McRobbie, Goldsmiths UK, and Martina Löw, TU Berlin

11.20 - 12.05 Scott Lash, Chinese University Hong Kong, The Space Economy of the Silk Road.
12.05 - 12.35 Martina Löw, TU Berlin, The Spatial Arrangement of Late Modern Societies.

DIGITALISED CULTURAL ECONOMIES AND SPATIAL PRACTICE I
